## The OT-505, so easy!

**ALCATEL is set to expand its mobile range with the launch of a brand new model: the OT-505. This ultra compact, stylish phone features an integrated camera so that you can capture all those magical moments wherever you are. And with its MMS facility, MP3 player and FM radio, the OT-505 is a cut above other entry-level mobiles. All that for less than 39€, without subscription!**

With its simple and elegant design, the OT-505 is available in two stylish colors: metallic silver or glossy red. It is ultra compact, weighs only 69 grams, and the back cover's soft and peachy finish offers easy handling.

### **Easy camera: One Touch SHARE**

Thanks to its VGA camera (128\*160) and its color screen, users can simply and efficiently share snapshots of their world. The genuinely intuitive menu, using ALCATEL's "One Touch SHARE" technology, lets users share their newly taken photos with their friends in just one click by MMS or Bluetooth®, or even use them as background image or assign them to their contacts.

### **Easy music: MP3 player and FM radio!**

All the OT-505's music features can be accessed directly via a dedicated button on the side of the handset. The perfect way to keep tuned in at all times of the day. Nothing could be simpler than listening to your favorite tunes and sharing them with friends via Bluetooth®. Or insert the micro SD card into your PC and pocket over 1,000 tracks. And for even more choice, 40 FM radio stations can be manually preset by the user. What's more, the OT-505 also boasts excellent battery life, with 7 hours talk-time and 9.5 hours playback time.

The OT-505 is the ideal phone for on-the-go users who value simplicity but who are still in search of a modern design, an integrated camera and fun features! All that on a shoestring.
